Schema for Real-time Web API..... 50

Appendix 57

Introduction

NJ Transit's Real Time Data Web API allows 3rd parties to access to our real-time data through an API interface.

Below is the swagger endpoint for Rail Data API:

Test: <https://testraildata.njtransit.com/swagger/index.html>

Production: <https://raildata.njtransit.com/swagger/index.html>

Web calls are for the real-time data. It's not for scheduled trips that have not left their origin. Users should not be constantly requesting data but only when there is a specific request. For schedule data beyond the next 19 departures from a station, the developer should be using the [getStationSchedule](#) data.

We urge developers to use Test Environment first, please do not develop in production environment. Please examine the data tag descriptions and appendixes closely in this document for most accurate information. For any questions with the real-time data interface, we can be contacted at ProductionPasscomm@njtransit.com.

NOTE: User access limits are set to allow reasonable daily usage. These limits will not allow further accesses to the web service for the remainder of the day. After midnight these will be reset to zero. **There will be only 10 accesses per day for getToken and isValidToken. Please call these methods once per day.**

There will be a 40,000 limit per day for the current and vehicle data.

Sign Up

To sign up, go to our portal at <https://developer.njtransit.com/registration> and click on “Register”. Fill in all the required information and once you register you will receive an e-mail with your Test and Production API credentials.

To get new token:

Please use below endpoint, daily usages limit: 10.

Test: <https://testraildata.njtransit.com/api/TrainData/getToken>

Production: <https://raildata.njtransit.com/api/TrainData/getToken>

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getToken' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'username=your username' \
  -F 'password=your password'
```

Rail Data Method Calls

There are nine types of method calls. Please use HttpPost method only, input parameter values in Body Form-Data:

1. getToken

Pass form values, username and password to get new token.

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getToken' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'username=your_username' \
  -F 'password=your_password'
```

Result #1:

```
{
  "Authenticated": "True",
  "UserToken": "your new token"
}
```

Result #2:

```
{
  "Authenticated": "False",
  "UserToken": ""
}
```

Result #3:

```
{
  "errorMessage": "Daily usage limit:10. Your current daily usage: 11"
}
```

Result #4: (when username/password or account is missing):

Null

2. isValidToken

Pass token to check if it's valid.

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/isValidToken' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'token=your token here'
```

Result #1:

```
{
  "validToken": true,
  "userID": "your username"
}
```

Result #2:

```
{
  "validToken": false,
  "userID": null
}
```

Result #3:

```
{
  "errorMessage": "Daily usage limit:10. Your current daily usage: 11"
}
```

Result #4: (when token is empty or not a valid length):

Null

3. getStationList

List all stations in JSON format.

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getStationList' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'token=your token here'
```

Result:

```
[
  {
    "STATION_2CHAR": "AM",
    "STATIONNAME": "Aberdeen-Matawan",
    "STATION_14CHAR": "Matawan"
  },

```

```
{
  "STATION_2CHAR": "AB",
  "STATIONNAME": "Absecon",
  "STATION_14CHAR": "Absecon"
},
...
]
```

Result #2:

```
{
  "errorMessage": "Invalid token."
}
```

Result #3 (when token is empty or not a valid length):

Null

4. getStationMSG

Gets station messages; When pass station code, returns station message; When pass Line code, returns train line messages. Note – this is provided by a third party data feed, when "MSG_SOURCE": "RSS_NJTRailAlerts", the message alerts are from NJ Transit RSS feed.

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getStationMSG' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'token=your token here' \
  -F 'station=NP' \
  -F 'line='
```

Result #1:

```
[

      "MSG_PUBDATE_UTC": "5/30/2024 3:52:40 PM"
    }
  ]

```

Result #2 when Fullscreen msg:

```

[
  {
    "MSG_TYPE": "fullscreen",
    "MSG_TEXT": "Full Screen Test MSG for Jersey Ave.",
    "MSG_PUBDATE": "5/30/2024 11:44:00 AM",
    "MSG_ID": "",
    "MSG_AGENCY": "NJT",

```

```

      "MSG_SOURCE": "",
      "MSG_STATION_SCOPE": "*Jersey Avenue",
      "MSG_LINE_SCOPE": " ",
      "MSG_PUBDATE_UTC": "5/30/2024 3:44:00 PM"
    }
  ]

```

Result #3 when no msg data:

```
[ ]
```

Result #4 (when token is empty or not a valid length):

Null

5. getStationSchedule

Provides a list of the 27 hours of train schedule data for any one station or all stations if no station is entered. Limited access to 5 times per day but only needed once per day after midnight - 12:30AM after would be better - to show the schedule for the 27 hour period from 12 midnight until 3am the next day. The GTFS data does not always match the daily schedules in our train control system.

Parameter `NJTonly` is a filter, pass true for NJT trains only; pass false for NJT and Amtrak trains. Parameter `station` is optional, pass empty to get data for all stations.

```

curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getStationSchedule' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'token=your token here' \
  -F 'station=NP' \
  -F 'NJTonly=false'

```

Result #1:

```

[
  {
    "STATION_2CHAR": "AB",
    "STATIONNAME": "Absecon",
    "ITEMS": [
      {
        "SCHED_DEP_DATE": "19-May-2023 12:19:15 AM",
        "DESTINATION": "Atlantic City",
        "TRACK": "Atlantic City Line",
        "LINE": "Atlantic City Line",

```

```

        "TRAIN_ID": "4643",
        "CONNECTING_TRAIN_ID": "",
        "STATION_POSITION": "1",
        "DIRECTION": "Eastbound",
        "DWELL_TIME": "45",
        "PERM_PICKUP": "False",
        "PERM_DROPOFF": "False",
        "STOP_CODE": "S"
    },
    {
        "SCHED_DEP_DATE": "19-May-2023 02:11:15 AM",
        "DESTINATION": "Atlantic City",
        "TRACK": "Atlantic City Line",
        "LINE": "Atlantic City Line",
        "TRAIN_ID": "4651",
        "CONNECTING_TRAIN_ID": "",
        "STATION_POSITION": "1",
        "DIRECTION": "Eastbound",
        "DWELL_TIME": "45",
        "PERM_PICKUP": "False",
        "PERM_DROPOFF": "False",
        "STOP_CODE": "S"
    },
    .....
]
}
]

```

Result #2:

```

{
    "errorMessage": "Invalid token."
}

```

Result #3 (when token is empty or not a valid length):

Null

6. **getTrainSchedule**

List train schedule for a given station in JSON format, data is much the same as DepartureVision with train stop list information. There is a limit on total schedule records, it starts with current time and gives 19 records for the selected station. This method includes the stops data for each train item.

Station messages are returned in this tag: "STATIONMSGs": [].

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getTrainSchedule' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'token= your token here' \
  -F 'station=NP'
```

Result #1 (When Fullscreen alert message takes over the schedules):

```
{
  "STATION_2CHAR": "JA",
  "STATIONNAME": "",
  "STATIONMSGs": [
    {
      "MSG_TYPE": "fullscreen",
      "MSG_TEXT": "Full Screen Test MSG for Jersey Ave.",
      "MSG_PUBDATE": "5/30/2024 11:44:00 AM",
      "MSG_ID": "",
      "MSG_AGENCY": "NJT",
      "MSG_SOURCE": "",
      "MSG_STATION_SCOPE": "*Jersey Avenue",
      "MSG_LINE_SCOPE": " ",
      "MSG_PUBDATE_UTC": "5/30/2024 3:44:00 PM"
    }
  ],
  "ITEMS": []
}
```

Result #2 (This is the normal 19 records):

```
{
  "STATION_2CHAR": "NP",
  "STATIONNAME": "Newark Penn",
  "STATIONMSGs": [
    {
      "MSG_TYPE": "banner",
      "MSG_TEXT": "Cloud: ATTENTION PASSENGERS NEW JERSEY TRANSIT WILL CROSS HONOR PATH  
TICKETS INTO NEW YORK",
      "MSG_PUBDATE": "12/21/2023 11:13:00 AM",
      "MSG_ID": "",
      "MSG_AGENCY": "",
      "MSG_SOURCE": "",
      "MSG_STATION_SCOPE": "*Newark Penn Station,*Newark Airport",
      "MSG_LINE_SCOPE": " ",
      "MSG_PUBDATE_UTC": "12/21/2023 4:13:00 PM"
    }
  ],
}
```

```

{
  "MSG_TYPE": "banner",
  "MSG_TEXT": "Cloud: ATTENTION ALL PASSENGERS DUE TO WEATHER CONDITIONS  ALL TRAINS
ARE SUBJECT TO DELAYS.",
  "MSG_PUBDATE": "12/18/2023 4:00:00 PM",
  "MSG_ID": "",
  "MSG_AGENCY": "AMT",
  "MSG_SOURCE": "",
  "MSG_STATION_SCOPE": "*Newark Penn Station,*Metropark,*Newark Airport",

]

```

Result #3:

```

{
  "errorMessage": "Invalid token."
}

```

Result #4 (when token is empty or when station is missing):

Null

7. getTrainSchedule19Rec

List train schedule for a given station in JSON format, data is much the same as DepartureVision, but without train stop list information. There is a limit on total schedule records, it starts with current time and gives 19 records for the selected station. Parameter line is optional, pass line code will filter data by train line in a station. Station messages are returned in this tag: "STATIONMSGs": [].

```
curl -X 'POST' \
  'https://testraildata.njtransit.com/api/TrainData/getTrainSchedule19Rec' \
  -H 'accept: text/plain' \
  -H 'Content-Type: multipart/form-data' \
  -F 'token=your token here' \
  -F 'station=NP' \
  -F 'line='
```

Result #1 (When full screen alert message takes over the schedule):

```
{
  "STATION_2CHAR": "JA",
  "STATIONNAME": "",
  "STATIONMSGs": [
    {
      "MSG_TYPE": "fullscreen",
      "MSG_TEXT": "Full Screen Test MSG for Jersey Ave.",
      "MSG_PUBDATE": "5/30/2024 11:44:00 AM",

      "MSG_PUBDATE_UTC": "5/30/2024 3:44:00 PM"
    }
  ],
  "ITEMS": []
}
```

Result #2(This is the normal 19 records)::

```
{
  "STATION_2CHAR": "NP",
  "STATIONNAME": "Newark Penn",
  "STATIONMSGs": [
    {
```

```

getToken Tag Description

Entity NAME	Type		Description
Authenticated	string		True or False
UserToken	string		New token, token expires in 24 hours in Production, daily limit 10

isValidToken Tag Description

Entity NAME	Type		Description
validToken	Boolean		True or False
userID	string		User ID if found

GetStationList Tag Description

Entity NAME	Type	Is Mandatory	Description
STATION_2CHAR	string	YES	2 Character Station Code - See Appendix V
STATIONNAME	string	YES	Station full name
STATION_14CHAR	string	YES	Station name limited to 14 characters

GetStationMSG Tag Description

Entity NAME	Type	Is Mandatory	Description
MSG_TYPE	string	YES	Message Type, value: banner or fullscreen
MSG_TEXT	string	YES	Message Text
MSG_PUBDATE	string	YES	Message Published Data/Time
MSG_ID	string	NO	Message ID from 3 rd party feed, value is empty most of time
MSG_AGENCY	string	NO	Agency, Value: NJT, AMT or Empty
MSG_SOURCE	string	NO	Source of Message, Value: RSS_NJTRailAlerts or empty
MSG_STATION_SCOPE	string	NO	Message Related Stations

MSG_LINE_SCOPE	string	NO	Message Related Train Lines
MSG_PUBDATE_UTC	string	YES	Message Published Data/Time in UTC format

GetStationSchedule Tag Description

Entity NAME	Type	Is Mandatory	Description
STATION_2CHAR	string	NO	2 Character Station Code - See Appendix V
STATIONNAME	string	NO	Station full name
ITEMS			
SCHED_DEP_DATE	string	YES	Scheduled Departure Date/Time at selected location
DESTINATION	string	YES	Destination Name
TRACK	string	NO	Scheduled Track - See Appendix II for Track Translations
Line	string	YES	Train Line Long name
TRAIN_ID	string	YES	Train number
CONNECTING_TRAIN_ID	string	NO	Used for NJCL, will show Long Branch connection to Bayhead
STATION_POSITION	string	YES	Type of station stop - See Appendix III
DIRECTION	string	YES	Value: Eastbound or Westbound
DWELL_TIME	string	NO	Used to get arrival time. This is the amount of time, in seconds, the train is to spend at the station, conditions allowing
PERM_PICKUP	string	NO	If True - This train will ONLY pick up customers at this stop, it will NOT discharge any passengers
PERM_DROPOFF	string	NO	If True - This train will ONLY discharge customers at this stop, it will NOT pick up any passengers
STOP_CODE	string	NO	Stop Code for train - See Appendix IV

GetTrainSchedule Tag Description:

Entity NAME	Type	Is Mandatory	Description
STATION_2CHAR	string	YES	2 Character Station Code - See Appendix V
STATIONNAME	string	YES	Station full name

STATIONMSG			Messages for selected station, tag description can be found in GetStationMSG
ITEMS			Includes information for each individual train
SCHED_DEP_DATE	string	YES	Scheduled Departure Date/Time at selected location
DESTINATION	string	YES	Destination Name
TRACK	string	YES	Track Number/Letter. See Appendix II for Track Translations
LINE	string	YES	Train Line
TRAIN_ID	string	YES	Train number
CONNECTING_TRAIN_ID	string	NO	Used for NJCL, will show Long Branch connection to Bayhead
STATUS	string	NO	Current train status
SEC_LATE	string	NO	Train Delay in Seconds
LAST_MODIFIED	string	NO	Last Updated Date/Time for this train
BACKCOLOR	string	YES	Background color for the line
FORECOLOR	string	YES	Foreground color for the line
SHADOWCOLOR	string	YES	Shadow color for the line
GPSLATITUDE	string	NO	Train GPS Latitude - in progress
GPSLONGITUDE	string	NO	Train GPS Longitude - in progress
GPSTIME	string	NO	Time the GPS Lat/long was captured
STATION_POSITION	string	YES	Type of station stop - See Appendix III
LINECODE	string	YES	2 Character Line Code - See Appendix VI
LINEABBREVIATION	string	YES	Train Line Abbreviation
INLINMSG	string	NO	In-line Message for the train at the selected station
CAPACITY			Train Capacity Data, value can be []
VEHICLE_NO	string	NO	Train ID
LATITUDE	string	NO	Value for latitude
LONGITUDE	string	NO	Value for longitude
CREATED_TIME	string	NO	Timestamp when data is created
VEHICLE_TYPE	string	NO	Type of vehicle
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLO	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count
PREV_PERCENTAGE	string	NO	Previous capacity percentage
PREV_CAPACITY_COLOR	string	NO	Color code for previous capacity
PREV_PASSENGER_COUNT	string	NO	Previous passenger count
SECTIONS			Capacity Section List
SECTION_POSITION	string	NO	Section position [Front, Middle, Back]
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLOR	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count

CARS			Capacity Car List
CAR_NO	string	NO	Car Number
CAR_POSITION	string	NO	Car position
CAR_REST	Boolean	NO	Car with restroom [true, false]
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLOR	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count
STOPS		YES	Train Stops, tag description can be found in GetTrainStopList

GetTrainSchedule19Rec Tag Description:

Entity NAME	Type	Is Mandatory	Description
STATION_2CHAR	string	YES	2 Character Station Code - See Appendix V
STATIONNAME	string	YES	Station full name
STATIONMSGs			Messages for selected station, tag description can be found in GetStationMSG
ITEMS			Includes information for each individual train
SCHED_DEP_DATE	string	YES	Scheduled Departure Date/Time at selected location
DESTINATION	string	YES	Destination Name
TRACK	string	YES	Track Number/Letter. See Appendix II for Track Translations
LINE	string	YES	Train Line
TRAIN_ID	string	YES	Train number
CONNECTING_TRAIN_ID		NO	Used for NJCL, will show Long Branch connection to Bayhead
STATUS	string	NO	Current train status
SEC_LATE	string	NO	Train Delay in Seconds
LAST_MODIFIED	string	NO	Last Updated Date/Time for this train
BACKCOLOR	string	YES	Background color for the line
FORECOLOR	string	YES	Foreground color for the line
SHADOWCOLOR	string	YES	Shadow color for the line
GPSLATITUDE	string	NO	Train GPS Latitude - in progress
GPSLONGITUDE	string	NO	Train GPS Longitude - in progress
GPSTIME	string	NO	Time the GPS Lat/long was captured
STATION_POSITION	string	YES	Type of station stop - See Appendix III
LINECODE	string	YES	2 Character Line Code - See Appendix VI
LINEABBREVIATION	string	YES	Train Line Abbreviation
INLINMSG	string	NO	In-line Message for the train at the selected station

CAPACITY			Train Capacity Data, value can be []
VEHICLE_NO	string	NO	Train ID

CAR_REST	Boolean	NO	Car with restroom [true, false]
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLOR	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count
STOPS		NO	Value is Null. For train stops, please use GetTrainStopList

GetTrainStopList Tag Description

Entity NAME	Type		Description
TRAIN_ID	string	YES	Train number
LINECODE	string	YES	2 Character Line Code - See Appendix VI
BACKCOLOR	string	YES	Background color for the line
FORECOLOR	string	YES	Foreground color for the line
SHADOWCOLOR	string	YES	Shadow color for the line
DESTINATION	string	YES	Destination Name
TRANSFERAT	string	NO	Used for NJCL, will show transfer at station for Long Branch connection to Bayhead Trains
STOPS			Stop List
STATION_2CHAR	string	NO	2 Character Station Code - See Appendix V
STATIONNAME	string	YES	Station full name

TIME	string	YES	Estimated Arrival Date/Time at selected station
PICKUP	string	NO	If True - This train will ONLY pick up customers at this stop, it will NOT discharge any passengers
DROPOFF	string	NO	If True - This train will ONLY discharge customers at this stop, it will NOT pick up any passengers
DEPARTED	string		Value: YES or NO
STOP_STATUS	string	NO	Status at the stop, Value: OnTime, Delayed, Cancelled, or Empty
DEP_TIME	string	YES	Scheduled Departure Date/Time at selected station
TIME_UTC_FORMAT	string	YES	Estimated Arrival Date/Time in UTC format
STOP_LINES		NO	For transfer options - Other Train Lines stop at same station
LINE_CODE	string	NO	2 Character Line Code - See Appendix VI
LINE_NAME	string	NO	Train Line
LINE_COLOR	string	NO	Train Line Color
CAPACITY			Train Capacity Data, value can be []
VEHICLE_NO	string	NO	Train ID
LATITUDE	string	NO	Value for latitude
LONGITUDE	string	NO	Value for longitude
CREATED_TIME	string	NO	Timestamp when data is created
VEHICLE_TYPE	string	NO	Type of vehicle
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLO	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count
PREV_PERCENTAGE	string	NO	Previous capacity percentage
PREV_CAPACITY_COLOR	string	NO	Color code for previous capacity
PREV_PASSENGER_COUNT	string	NO	Previous passenger count
SECTIONS			Capacity Section List
SECTION_POSITION	string	NO	Section position [Front, Middle, Back]
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLOR	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count
CARS			Capacity Car List
CAR_NO	string	NO	Car Number
CAR_POSITION	string	NO	Car position
CAR_REST	Boolean	NO	Car with restroom [true, false]
CUR_PERCENTAGE	string	NO	Current capacity percentage
CUR_CAPACITY_COLOR	string	NO	Color code for current capacity
CUR_PASSENGER_COUNT	string	NO	Current passenger count

GetVehicleData Tag Description

Entity NAME	Type		Description
TRAINS			List of trains
ID	string	YES	Train number
TRAIN_LINE	string	YES	Train Line
DIRECTION	string	YES	Eastbound or Westbound
ICS_TRACK_CKT	string	YES	Last identified track circuit ID for train
LAST_MODIFIED	string	YES	Last Updated Date/Time for this train
SCHED_DEP_TIME	string	YES	Scheduled Departure Date/Time at selected location
SEC_LATE	string	NO	Train Delay in Seconds
NEXT_STOP	string	NO	Next stop for train
LONGITUDE	string	NO	Last identified longitude
LATITUDE	string	NO	Last identified latitude

Appendix

I. Train ID Prefixes

Some of the TrainIDs have a prefix in front of the number; e.g. “A126”. See table below for descriptions.

<u>Prefix</u>	<u>Description</u>
A	Amtrak Train
S	Septa Train
X	Non-Revenue train – Does not accept passengers

II. Track Translations

When using the track data at a few stations there is a translation between railroad track that is provided in the data and the public track that the public sees at the station. Use the table below for those translations.

<u>TRACK</u>	<u>TRANSLATION</u>	<u>STATION</u>
Single	1	Lebanon
2	1	Metropark
B	2	Montclair State U
Single	1	Montclair State U
0	A	Newark Airport
4	E	Secaucus Lower Lvl
2	F	Secaucus Lower Lvl
3	H	Secaucus Lower Lvl
1	G	Secaucus Lower Lvl
Single	S	Summit

III. Station Positions

<u>Station Position</u>	<u>TRANSLATION</u>
0	Origin Station
1	Valid Stop between Origin and Terminate Station
2	Terminate Station

IV. Station Stop Codes

<u>Stop Code</u>	<u>TRANSLATION</u>
A	Arrival time
S	Normal Stop
S	Normal stop. May leave up to 3 minutes early
LS	Leaves 1 minute before scheduled time
L	Train can leave before scheduled departure. Will hold for connections
H	Will hold for connection unless authorize by dispatcher
D	Stop to discharge passengers only. May leave ahead of schedule
R	Stop to receive passengers only
R*	Stop to receive passengers only. May leave 3 minutes early
E	Employee stop. May leave ahead of schedule

V. Station 2 Character Codes

STATION NAME	STATION 2CHAR
Aberdeen-Matawan	AM
Absecon	AB
Allendale	AZ
Allenhurst	AH
Anderson Street	AS
